REACH Regulations

Page 1 of 1

Registration Evaluation Authorisation and Restriction of Chemicals

On December 13th the European Parliament adopted the REACH regulations concerning the registration, evaluation, authorisation and restriction of chemicals. REACH entered into force on June 1st 2007.

Protex Fasteners Ltd has identified themselves as downstream users and is currently preparing itself to be compliant with REACH with regards to substances used in its manufacturing processes

We have started the initial communication process with all of our suppliers to ensure that all substances supplied will be pre-registered to allow continued safe use within our products.

As the guidance documents are still not complete, it remains difficult to predict precisely the impact on industry as a whole and difficult to answer some of the questions raised at this stage. As soon as guidance is available we will act accordingly.

This statement has been prepared to answer customers' initial general queries.

If any further REACH information is required, please send all enquiries to:
