RoHS Directive

Page 1 of 1

Restriction of Hazardous Substances Directive End of Life Vehicle Directive

The European Union has issued directives that prohibit the use of certain hazardous substances. The RoHS (Restriction of Hazardous Substances) directive became effective July 1, 2006.

The ELV (End of Life Vehicle) Directive becomes effective July 1, 2007.

Protex Fasteners completed the changeover from non-compliant items in our product range in 2007. All of our product range is now manufactured in compliance with the current revision of the European RoHS Directive.

In such cases, compliance with RoHS has resulted in an aesthetic change to these products. The Zinc plated Yellow Colour Passivate finish offered now appears slightly paler than before, but still offers the same level of protection.

If any further RoHS information is required, please send all enquiries to:
rohs@protex.com
